NORTHWEST MISSOURI STATE COLLEGE

Vol. 28, No. 34 — Maryville, Missouri — May 10, 1968

Committee Proposed for Better Student-Faculty Communication

A proposal by President Robert P. Foster for a new student-faculty committee highlighted the May 2 Student Senate's regular meeting.

The new committee proposal is designed to improve communications between students, faculty, and administration at MSC. The committee's function would be to review present and future college policies, student campus activities, and controversial issues for recommendation to the Senate and faculty council. Action on the proposal was postponed.

In other business, it was announced that the proposed National Organization of Student Patriots constitution was withdrawn. J. D. Morris, local representative, has also withdrawn as an organizer for the national organization.

Vice president Barry Mon-

Deadline Announced

For Literary Edition

All creative writing to be used in the Spring Literary Edition of the Missourian should be turned in by May 15.

Work to be entered in the poetry division should be turned in to Dr. Frank Grube. Any essays or fiction entries should be submitted to Mrs. T. H. Eckert.

aghan mentioned student complaints about men's dress regulations at meals. President Mike Wilson explained that petitions were now being circulated with reference to these complaints.

Senator Kim Sienkiewicz, speaking for several students who had approached him, suggested a new student newspaper for MSC. Discussion followed concerning an alleged fund set up for student publications. John Ford, Missourian editorial board member, explained the responsibilities of a student newspaper and that other student papers are encouraged but rarely have enough financial support for survival.

Honorary Fraternity Inducts Leaders, Members, Pledges

Michael Miller was installed as president of Zeta Lambda chapter of Kappa Delta Pi, national honor society for students majoring in education, Wednesday at a formal service in Lower Lakeview room of the Union.

Other officers installed were Wendee Beam, vice president; Mary Asbell, secretary; Linda Britt, treasurer, and Ellen Ib-

Garrett-Strong Science Building at Northwest Missouri State College

* * *

NASA Executive to Dedicate Garrett-Strong Science Facility

MSC's new Garrett-Strong Hall of Science will be dedicated by Dr. D. D. Wyatt, NASA executive and former resident of Northwest Missouri, at 2:30 p. m., May 31.

The dedication ceremony will take place in the Administration Building auditorium and will be open to the public. Dr. Wyatt's address will be

entitled "Responsibility and Opportunity — The Challenge of Our Scientific Age." An open house in the new science building will immediately follow the dedication services.

In 1941, Dr. Wyatt, native of St. Joseph, where he attended public schools, earned his BS degree in Mechanical Engineering at the Missouri School of Mines and Metallurgy at Rolla, presently the University of Missouri at Rolla. In June, 1963, he received an honorary doctorate in engineering from his alma mater.

Since attaining his degree, he has worked for the General Electric Company, instructed mechanical engineering classes at his alma mater, served the National Advisory Committee for Aeronautics as a research engineer at the Lewis Flight Propulsion Laboratory in Cleveland, Ohio, and held the position of Associate Chief, Propulsion Aerodynamics

Division, specializing in personnel propulsion research. In September, 1958, he was transferred to Washington, D. C.

Upon the creation of the National Aeronautics and Space Administration, October, 1958, he became technical assistant to the Director of Space Flight Development of NASA. He worked his way up through various pertinent NASA positions to his present position, head of the Office of Program Plans and Analysis, which he received in March, 1967.

In his present position he has the responsibility of evaluating the program's actions to insure that adequate agency matters of concern and that problems, issues, alternatives, and possible consequences of the actions are identified clearly.

Dr. Wyatt is the author of numerous technical articles and reports concerning topics in the fields of mechanical engineering.

The dedication of the new building will be centered around the comparison of the new facets of the building, its discoveries and developments with the newness of constant furnishings, and equipment in the science world on which Dr. Wyatt is an authority.

Other pictures and stories about the new building and the dedication are published on pages four and five.

BULLETIN

David Hockensmith announced Wednesday at the Student Forum that a campus-wide presidential preference poll will be from 10 a. m. to 4 p. m. Thursday in the den of the Union.

The ballots will include all major candidates with provisions for write-in candidates. Students will also be given the opportunity to express their opinions on such topics as Viet Nam negotiation representatives, negative income tax, corporate income tax, the electoral college, and a coalition government in Viet Nam.

The election is under the auspices of the Union Board and the Student Senate.

Methodist Church

Senior to Present Recital

Richard Smetana and his accompanist, Maureen Nichols

Richard Smetana, Council Bluffs, will present his senior recital Wednesday at 8 p. m. in the Charles Johnson Theater.

Mr. Smetana, saxophonist, will be assisted by the woodwind quintet. It consists of Linda Strain, flautist; Melody Price, clarinetist; Laurie Barr, oboist; Mickey Pierce, French hornist, and Sherry

Cook, bassoonist. Maureen Nichols will serve as his pianist.

"Andante and Allegro" by Chailleux, "Three Dances and an Air" by Handel, "Capriccioso" by Jeanjean, and "Les Fetes de L'Hymen" by Rameau will be presented.

A senior, Mr. Smetana has signed a contract to teach music at Arnold's Park, Iowa, next fall.

ter, Kappa Omicron Phi went to Kirksville last Friday to install a chapter.

Those participating included Mary Ann Combs, Kathryn Johnson, Karen Brady, Shirley Mabary, Roxanna Holleman, and Rosalie West. Miss Mabel Cook, sponsor, accompanied the women.

Mrs. Sandra Bills Talliaferro, Lawrence, Kan., national president of the honorary home economics organization, was in charge of installation services.

The next meeting of the Homecoming committee will be next fall.

Northwest State Tower Choir Rehearses for Sunday Concert

Floyd Houghtons Plan Summer Trip Abroad

Mr. Floyd B. Houghton, associate professor of agriculture, and Mrs. Houghton will participate in a Goodwill People-to-People Inspection Tour of Europe and the Soviet Union this summer.

As part of the 24-member Missouri Agricultural Leaders Delegation, Mr. and Mrs. Houghton will leave July 16 for a 21-day tour of Belgium, Holland, the Soviet Union, Switzerland, Czechoslovakia, Germany and Spain.

"One purpose of the trip is to promote understanding and improve relations toward the American people," stated Mr. Houghton. "In addition, the tour will give Missouri agricultural leaders a first-hand look at export possibilities for Missouri farm products," he added.

Mr. and Mrs. Houghton took a similar trip abroad in 1966, when livestock production in seven countries was studied. Mr. Houghton plans to take movies and slides which will be beneficial in classroom activities.

Pinned:

Linda Jensen, Council Bluffs, to Stephen Provenzo, Providence, R. I.

Virginia Purvis, St. Joseph, to David Deeken, Wathena, Kan.

Mr. Byron Mitchell directs the Tower choir as it rehearses the "Sacred Service," which it will present to the public at 3 p. m. Sunday in the Maryville Methodist Church. At the right is Larry Mannasmith, soloist, and Mrs. Byron Mitchell, organist.

The Tower Choir will present a program at 3 p. m. Sunday at the First Methodist Church under the direction of Mr. Byron Mitchell.

The program, open to the public, is the presentation of a large choral composition, "Sacred Service," by Ernest Bloch, a Jewish composer. The Jewish music was originally used for a worship service.

Dr. Grube Elected MADE President

Dr. Frank W. Grube, chairman of the Division of Language and Literature, recently was elected president of the Missouri Association of Departments of English (MADE) in Sedalia.

For the past two years, Dr. Grube has acted as president pro tempore while the association was being organized. The members have now approved their constitution.

Some of the topics these department chairmen will discuss are the problems of freshmen English, the recruitment of qualified teachers, and courses that should be included in the curriculum.

The group will meet in conjunction with MATE.

The three soloists are Mr. Gilbert Whitney, baritone; Larry Mannasmith, baritone, and Carolyn Hoffman, soprano. The 46-member choir will be accompanied by Mrs. Frances Mitchell, organist.

Four Faculty Members

Four faculty members of the MSC Division of Science and Mathematics served as judges Saturday for the Harrison County Science Fair, Bethany.

The members attending were Dr. Ted Weichinger, division chairman; Mr. Myrl Long, physical science assistant professor; Mr. George Barratt, mathematics assistant professor, and Mr. Richard Landes, chemistry instructor.

Subscribers Must File Address for Summer

All students who will not be Maryville residents this summer are asked to fill out change of address forms for publication subscriptions.

These forms, which should be sent to magazine publishers, may be obtained at the desks in the women's residence halls. Men should obtain them from Mr. Randy Wollcott's office or from their housemothers. The forms may also be obtained in the mailroom on the second floor of the Administration Building.

Underclassmen Get Hudson Hall Grants

Hudson Hall scholarships, a newly initiated honors program, were awarded May 1.

Linda Jensen, Council Bluffs, Iowa, a sophomore, received the \$150 scholarship; Fern Oiphant, Richmond, a freshman, the \$100 award. The scholarships were granted on scholastic standing, activities, potential, need, and the girls' contributions to the hall.

If either of the two recipients is unable to accept her scholarship, Susan Holeman, King City, alternate, will receive it.

Those who served on the selection committee were the executive board of Hudson Hall council; Mrs. Dorothy Hildebrand, housemother, and Miss Karen Licklider, dean of women.

Agriculture Team Gets Top Award

The MSC livestock judging team made the top score in the Southern Region Livestock, Dairy, and Soils Judging Conference held May 4 at Austin Peay State College, Clarksville, Tenn.

The contest included nine classes in beef cattle, sheep, and swine with six oral reasons classes. The team, coached by Mr. F. B. Houghton Sr., includes James Cox, Gary Hoover, Gary Hull, Alan Goodspeed, and Byron Leu.

Goodspeed and Leu were high point individuals in the contest with 671 points each out of a possible 750.

Dave Horsman Wins Sports Writing Medal.

David Horsman, Northwest Missourian sports editor, won a medal for submitting the outstanding sports feature story among all Group B entries in the recently completed Missouri College Newspaper Association contest.

Other Missourian staff writers receiving Rank I ratings in their respective categories include Ruth Moore, column writing; Horsman, sports story; Beverly Beeks, critical review; Jim Rash, photography, and Kathi Ebbrecht, Marjorie Hitchcock (two first awards,) and Ruth Moore, editorials.

Of 27 entries, three Rank II ratings and five Rank III ratings, in addition to the eight Rank I's listed, were received by Missourian reporters. All ranked entries are considered outstanding, with each writer receiving a special certificate of commendation for his top rating article.

Four college newspapers in Missouri were given Outstanding College Newspaper Awards for 1967-68 at the May 3 spring luncheon of the association.

Papers winning the top awards in their respective classes were The Maneater, University of Missouri, Columbia; The Student, Central Missouri State College, Warrensburg; Stephens Life, Stephens College, Columbia, and The Megaphone, Culver - Stockton College, Canton.

Individual entries from the 19 participating colleges were also judged in 10 different categories. The Missourian was in competition with the other state colleges and the University of Missouri at St. Louis.

Sanford Pupils to Give Double Piano Recital

A two-piano recital by Mrs. Dee Ann Decklever and Mrs. Kathryn Govier, pupils of Mrs. Donald Sandford, will be given Monday in the Charles Johnson Theater of the Olive DeLuce Fine Arts Building.

Mrs. Decklever, an MSC junior, is a piano and voice major and has studied at Drake University. Also a junior, Mrs. Govier is a piano major. She has studied at the University of Texas and North Texas State University.

The program will consist of "Sicilienne" by Bach; "Allegro from Trio in D Minor" by Bach; "Waltzes Opus 39, No. 1, 2, 11, 14, and 15" by Brahms; "Caprice Viennois" by Fritz Kreisler; "Rondo for Two Pianos" by Chopin, and "Scaramouche Suite" by Milhaud.

TKE Sponsor Formal, Tap Auxiliary Members

Tau Kappa Epsilon fraternity held its annual spring formal Saturday evening, according to Steve Conner, social chairman.

Hila Rankin was chosen as the chapter sweetheart. Mike Brennen was honored as the top pledge. The theme of the dance was "Oriental Gardens."

Karla Hoffer, Cindy Smith, Joyce Rusch, Linda Jensen, Jeannie Hutsell, and Jenny Ford were tapped as new members of the TKE auxiliary, Daughters of Dianna.

Industrial Arts Models Displayed

Mike Cesaretti, junior in advanced architecture, point out the aspects of his design of a supper club to Darrel Olson, junior, and Dr. Crist.

Individual projects like the one above are the result of nearly three weeks' work by students enrolled in Industrial Arts 112, a course in advanced architectural drawing.

Students were allowed to choose either houses, churches, or recreational buildings as their projects. Before construction of the models began, the students drew their own plans for scale buildings. Landscaping and site selection were also done as part of the project.

Dr. LeRoy Crist is the instructor of I. A. 112 students.

MSC Home Economics

Attend MHEA Meet

Mrs. Virginia Bouska, Miss Pat Mitch, and Miss Joyce Waldron, members of the home economics faculty, recently participated in the annual meeting of the Missouri Home Economics Association held in Cape Girardeau.

Miss Waldron has served this year as president of the Northwest District Missouri Home Economics Association. Mrs. Bouska, state chairman of the committee on aging, gave a report on the committee's progress. Miss Mitch attended the MHEA business meeting, which voted on a new constitution for college MHEA members.

Area Instructors Attend Workshop In Grade Science

A workshop and an exhibit of text and laboratory materials for elementary and junior high teachers who teach science were held in the Horace Mann Auditorium Apr. 27.

Fourteen area junior high teachers attended the secondary education program entitled "Time, Space, and Matter"; thirty-three area elementary teachers attended the program concerning elementary science experiences and studies.

Mr. Leonard Marks, science consultant for the Webster Division of McGraw-Hill Book Company, and Miss Anna Gorsuch, assistant professor of elementary science education at MSC, conducted the meeting.

NORTHWEST MISSOURIAN—MAY 10, 1968—PAGE THREE

Initial Performance to Bring

'Men of Two Worlds' Here

"Men of Two Worlds," a world premiere by Dr. Jose Cid, will be presented at 8 p. m. May 20 and 21 in the Administration Building Auditorium.

Translated from Spanish into English by Miss Mary Jackson, assistant professor of Spanish, "Men of Two Worlds" is a dramatic trilogy. Dr. Cid, noted Cuban playwright, develops each part into a complete one-act play with the three parts forming a more extended theme.

Under the supervision of Dr. R. E. Fulsom, chairman of the speech and drama department, each act will be directed by students, Gail Bullis, Rich-

ard Heinz, and Loring Miller. Miss Jackson's translation will be published by the MSC Studies Series.

The drama contains psychological depth and intense action stemming from human emotions which are typical of Dr. Cid's plays. Also included is a universality that is denoted by being unrestricted in both time and place.

"Men of Two Worlds" portrays man's complex character in its frailty as well as in its nobility. Dr. Cid carefully constructs his dialog so that the actors communicate easily with the spectator.

The theater of Jose Cid appeals to various levels in that the depth of meaning can be comprehended in direct proportion to the ability of the spectator to understand. The characters in the drama are drawn with incisive clarity which makes them think, feel, and act as real-life people.

Dr. Cid received his doctorate from the University of Havana in 1938. He has written various works for presentation in Latin America, Spain, and the United States. Among the many awards the author has received is the 1927 First International Prize in Literature at Madrid, Spain.

Both Dr. and Mrs. Cid are authorities on pre-Colombian theater and hold positions in the field of Hispanic studies. Mrs. Cid, who also has a doctorate, was the Distinguished Lecturer for the department of foreign language at MSC last spring.

Following the opening night performance, a reception will be given in honor of Dr. and Mrs. Cid.

Mathematics Society Elects New Officers

Members of Theta Sigma Pi, mathematics society, elected officers for the coming year at their last regular business meeting.

Dixiebelle Lightle was elected president. She will be assisted by Werner Lumm, vice president; Marlys Williams, secretary, and Ted Coleman, treasurer.

Sunday morning mothers and daughters attended the church of their choice. For many mothers the weekend provided their first real taste of college life.

MSC's Division of Science and Mathematics

New Science Hall Is Named To Honor Former Professors

Mr. William T. Garrett

Dr. J. Gordon Strong

The new Garrett-Strong Hall of Science has been named in honor of two emeritus professors of the MSC Division of Science and Mathematics, Mr. William T. Garrett and Dr. J. Gordon Strong.

In 1927 Mr. Garrett joined the biology faculty, and in 1932 he was appointed to the position of biology department chairman. He remained its chairman for 33 years until his retirement in 1965.

The emeritus MSC professor earned his BA degree in 1923 at Westminster College, Fulton, and served as chairman of the biology department at Arkansas College, Batesville, before coming to MSC. He earned his master's degree in 1928 at the University of Chicago.

Mr. Garrett has been active in many scientific and professional organizations. He served the MSC chapter of AAUP as president, 1936-38; the Missouri Academy of Science as a regional board member, 1950-60; the Missouri Nature Conservancy Chapter as board chairman, 1958, and is a member of the National Audubon Society and Missouri Museum Association.

The 1951 Tower was dedicated to Mr. Garrett. He is listed in "Who's Who in Missouri," "Who's Who in the Midwest," and "Leaders in American Science," and he is author of several works such as "Ecology and Human Problems," published in 1938, and "Straw for the Brick," published in 1951.

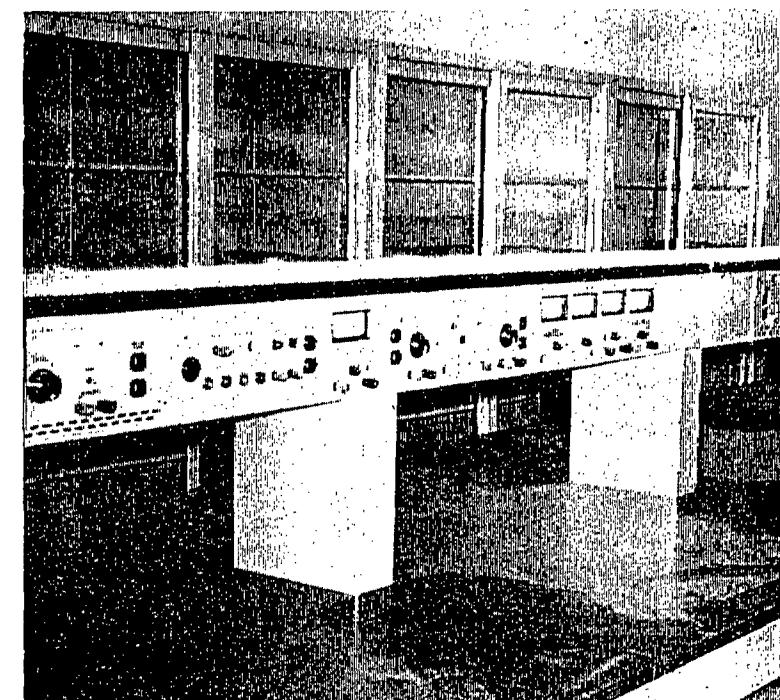

Dr. Strong, professor in the MSC chemistry department from 1943 until his retirement in 1964, served as chairman of the department and also as chairman of the entire Division of Science and Mathematics for several years.

He earned his BS degree at Muskingum College, New Concord, Ohio; his MA at Ohio State University, and his PhD at the University of Colorado. In 1916 he began his teaching career at Gordon College, Rawal Pindi, India, presently Pakistan's capital. He served as chemistry professor at Tarkio College 23 years before coming to MSC.

Some of his numerous activities include affiliations with the American Chemical Society, AAUP, Missouri State Teachers Association, and the Maryville Kiwanis Club.

Because of the many contributions the two emeritus professors have made to the college, the community, and their respective fields of science, the new science building has been named in their honor.

The physical science lecture hall, one of two new lecture areas in the new complex, can seat 120 students. Its floor is elevated and tiered; its ceiling is acoustically engineered.

The advanced physics laboratories provide electronic equipment panels for more adequate study in electronics and electronic measurement.

Co-ordinate Design Adorns Campus; Modern Facilities Provide More Opportunities

The \$3,000,000 Garrett-Strong Hall of Science will house the biology, chemistry, geology, physical science, physics, mathematics, and science education courses beginning with the 1968 summer session.

The completely air-conditioned building was designed by the Herschman and Douglas firm, St. Joseph. Glaze Construction Company was the general contractor for the building, and Bowlus School Supply Company and Taylor Manufacturing Company supplied the office, classroom, and laboratory furniture.

Offices, classrooms and laboratories for mathematics, physics, geology, physical science, and science education are located on the first floor. The second floor houses the biology offices, classrooms, and laboratories. The third level houses mathematics and chemistry offices, classrooms, and laboratories and an on-the-roof greenhouse for the biology department.

Two large lecture halls are located in the west end of the second floor. One is for physical science; the other, biological science.

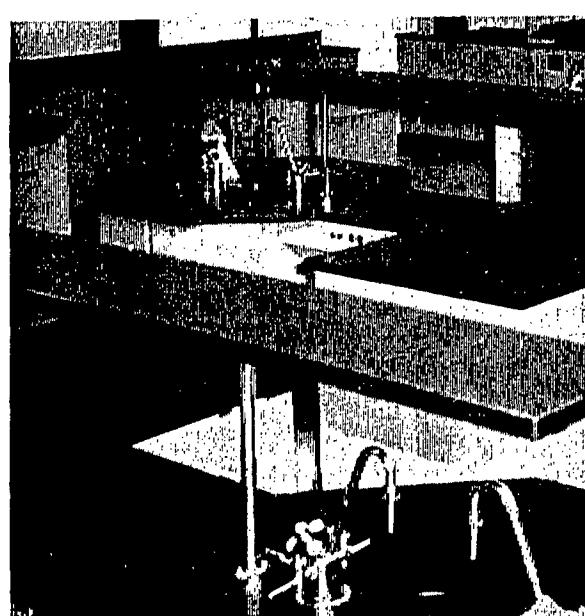

The information office for the Division of Science and Mathematics is located near the center of the second floor; faculty and student lounges are on the first floor, and seminar rooms for both seminar and study purposes are located on each floor.

A combination geology seminar and museum is on the first floor.

The building, erected north of the Administration Building, is a modified L-shape with the lecture hall complex on the west, giving it somewhat of a T-shape. It contains an area of more than 100,000 square feet. It is a three-story building except for the lecture hall complex, which is two-stories tall.

Of the \$3,000,000 total cost for the building, furniture, and equipment, more than \$200,000 was used to buy the new laboratory equipment.

The State of Missouri appropriated \$2,000,000 for the building project, and \$1,000,000 was granted from federal funds allocated under the Higher Education Facilities Act.

This new chemistry laboratory, one of four identical work areas, has all new equipment. All four labs are located on the third floor.

Presents the Garrett-Strong Hall of Science

Faculty, Curriculum, Facilities Expand

The MSC Division of Science and Mathematics has steadily grown the past decade both in faculty and number of student enrollees.

Ten years ago when the 1957-58 freshman class enrolled, the division consisted of eight faculty members, with Dr. J. Gordon Strong heading the entire division.

When most of this year's graduating class of 1963-64 freshmen enrolled, the division had more than doubled in size. It was made up of approximately 18 faculty members with the entire division still headed by Dr. Strong.

With enrollment of the 1967-68 freshman class, the division, still growing, has 31 faculty members. Dr. Theodore Weichinger Jr. is the acting chairman of the division.

Since the 1957-58 school year of 10 years ago, the division has nearly quadrupled itself in number of faculty members and has added new programs.

According to Dr. Weichinger, until the 1965-66 academic year, the division's different departments were fewer than those at the present. The biology department, mathematics department, and physical science department, which included general physical science, chemistry, and physics, constituted the three departments in the division.

In September, 1965, another department was added when a separate department was created for chemistry, and the physical science department added science education.

In September, 1966, the physical science department added a new area of study, geology, and the already established departments remained unchanged.

This year the division has added another separate department for physics, making a total of five. The present set-up of the division is the biology, mathematics, chemistry, physics, and physical science sections. The physical science department is subdivided into physical science, geology, and science education.

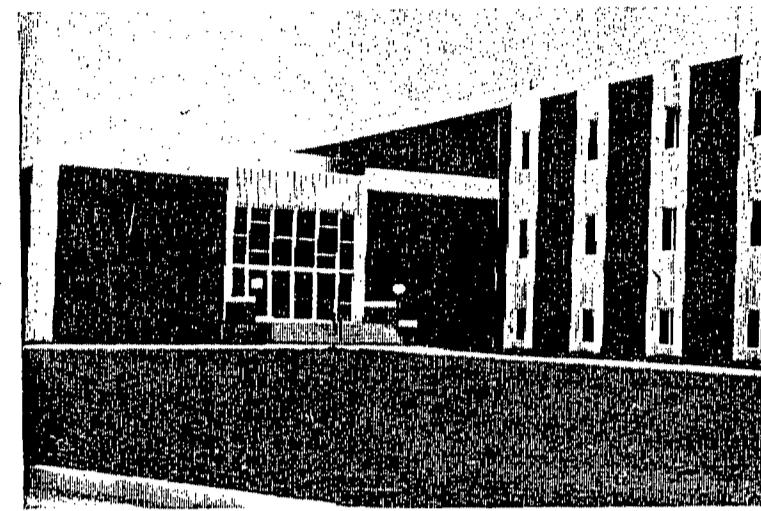

The division has grown in faculty and curriculum largely the last ten years, and it is still pushing forward with its third area of growth—the new Garrett-Strong Hall of Science.

Expanding as rapidly as the new facilities, course offerings in the sciences are also expanding.

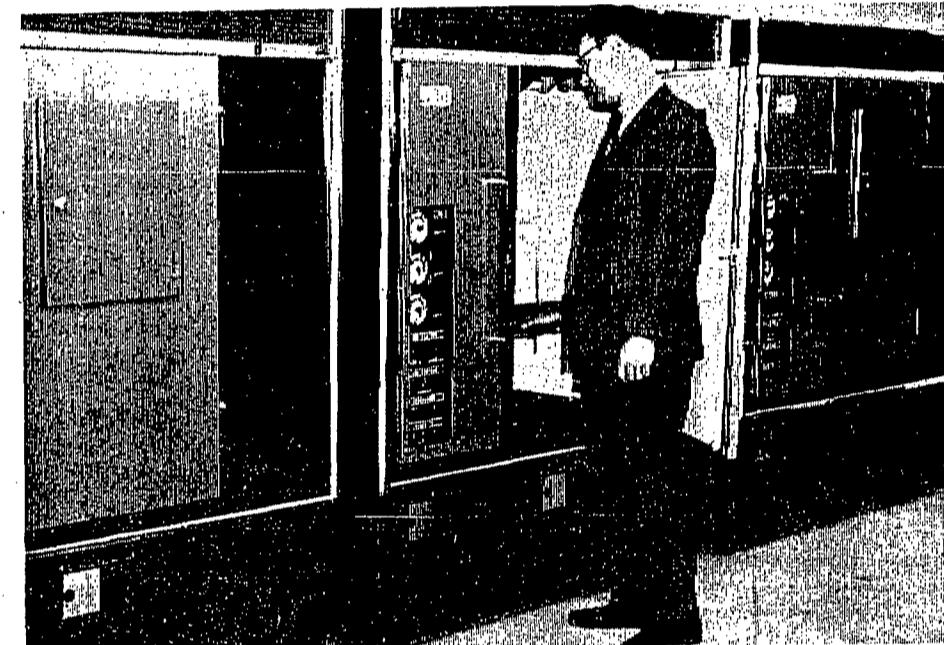

Master's degrees in chemistry and biology are already being offered under MSC's new graduate program, and graduate degrees in physics and other science areas are in the making. Programs in applied physics have been introduced for the first time this spring semester, the initial course involving work in the field of scientific computers.

A new program for elementary education majors has been initiated this year, and new laboratory courses in physical science and geology have been developed.

With the availability of the new facilities of the complex, the geology program will grow in variety and number of available courses to be continued during the summer sessions to meet certification requirements and those for graduate study.

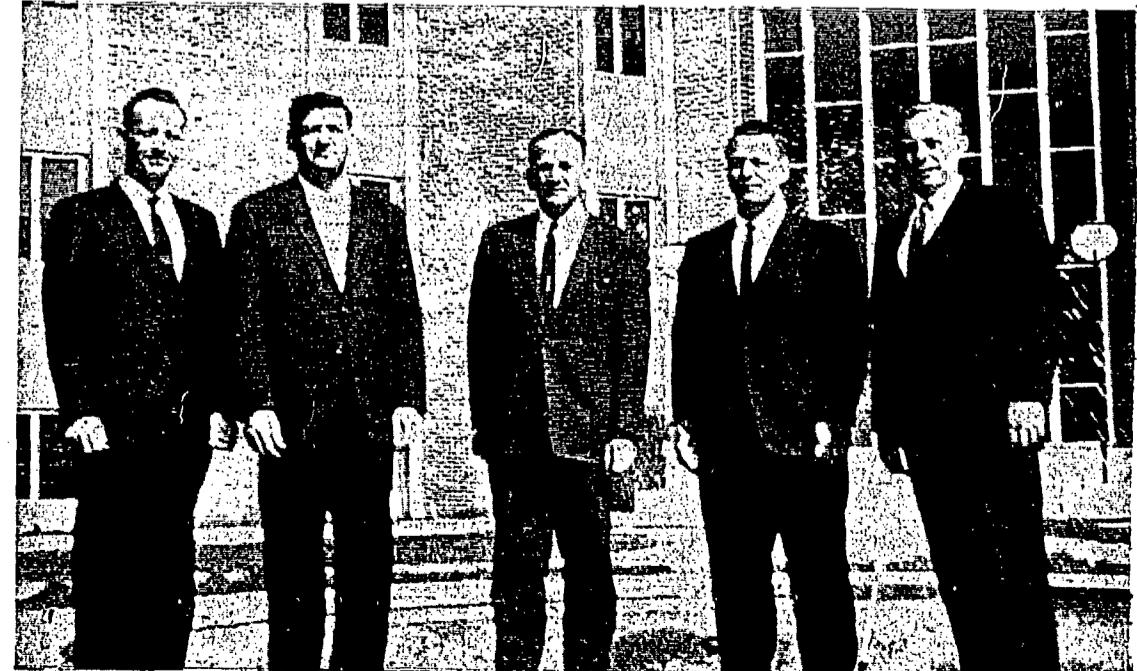

The two-story high lecture hall complex for physical and biological science lectures juts from the modified L-shape to the west.

Dr. Bill Scott, member of the biology department, is observing one of the department's three new growth chambers. The chambers provide the conditions necessary to culture ideal type of organisms for laboratory study and observation, because they are capable of being excellently controlled by temperature and humidity.

The Division of Science and Mathematics department chairmen stand by the circular fountain in front of Garrett-Strong Hall of Science. They are Dr. Kenneth Minter, biology; Dr. Sam Carpenter, chemistry;

Dr. Densil Cooper, physics; Mr. Marvin Gutzmer, mathematics; and Dr. Theodore Weichinger Jr., physical science, science education, and geology and, in addition, the division chairman.

Embers' Honoree Proposes: 'More Student Involvement'

Miss Marjorie Hitchcock, senior from Atlantic, Iowa, was selected Honorary Coed of the Month, by Embers, senior women's honorary organization.

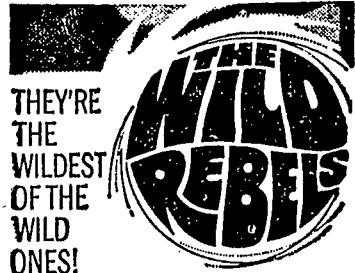

Marjorie Hitchcock

Working for a BA degree in English and forensics combined with a journalism concentration, Miss Hitchcock has participated in school activities since her freshman year.

A member of the Northwest Missourian staff for three years, she has held the positions of reporter, editorialist, co-managing editor and is currently co-editor of the

school paper. This past summer, she was a staff reporter for the Council Bluffs, Iowa, Nonpareil.

Also active in the speech department, Miss Hitchcock has been a varsity debater for four years. She has engaged in competitive discussion and oral interpretation and has finished third in Missouri in oratory.

In January, she presented a joint senior recital in oral interpretation. Miss Hitchcock has been a guest speaker at various clubs and at dinner programs in the area. This year the busy coed was selected for Who's Who.

Miss Hitchcock has definite ideas about the structure and purpose of classes. She believes: "Basic required courses should be made meaningful to the students. The elementary courses should be geared for practical use for whatever field the student is interested in."

"In many cases, the way the courses are now structured students fail to receive an applicable knowledge that will benefit them in their careers," she believes.

"Involvement should be a key word for all college students — involvement in their major field and its related activities," she stated. "Students should willingly attend lectures, seminars, and conferences that will supplement their classroom work."

Participation in activities can be as important as a high grade average, the Missourian editor said, adding that ideally, activities and academic endeavors should complement one another.

To the question, "Do you feel that the teacher has an obligation to the student?" Miss Hitchcock replied, "The in-

structor has an obligation to make his classes interesting and meaningful to the student. Besides meeting the instructor's requirements, students should know what they expect to receive from a course and strive to reach that goal."

Concluding the interview, Miss Hitchcock commented, "My four years at MSC have been good years. They have provided me the opportunity to experiment in the fields of speech and journalism and to work for the college in these areas. From these experiences I have found that they are the fields I wish to pursue after graduation."

FINAL EXAMINATION SCHEDULE

Second Semester

Friday, May 24 through Wednesday, May 29, 1968

Classes meeting for the first time in the week:

8:00 Monday	Friday, May 24,	7:30 - 9:30
8:00 Tuesday		10:00 - 12:00
History 51 (All Sections)		1:00 - 3:00

(Students with four or more examinations scheduled on the same day may petition the Dean of Administration to have one or more rescheduled to expedite a maximum of three.)

Stephens Professor To Give Lecture About Mr. Truman

The Social Science Division will present a visiting lecturer, Dr. Gene Schmidlein, Columbia, to this campus Monday.

The chairman of the department of social studies, Stephens College, will lecture on "Harry Truman, the Senator and President," at 2 p. m. in Room 314, Golden Hall.

Monday evening he will be the guest speaker at the annual Social Science Club dinner at the J. W. Jones Union. He will give an evaluation report on the social science curriculum projects going on throughout the United States on various university campuses. He recently participated in an evaluation conference in Wisconsin.

Dr. Schmidlein has his AB from Conception, MA, Notre Dame, and his PhD degree from the University of Missouri, Columbia. He wrote his doctoral dissertation on "Harry Truman" working under the direction of Dr. Richard Kirkendall, who has lectured on this campus several times in recent years.

Concluding the interview, Miss Hitchcock commented, "My four years at MSC have been good years. They have provided me the opportunity to experiment in the fields of speech and journalism and to work for the college in these areas. From these experiences I have found that they are the fields I wish to pursue after graduation."

Participation in activities can be as important as a high grade average, the Missourian editor said, adding that ideally, activities and academic endeavors should complement one another.

To the question, "Do you feel that the teacher has an obligation to the student?" Miss Hitchcock replied, "The in-

structor has an obligation to make his classes interesting and meaningful to the student. Besides meeting the instructor's requirements, students should know what they expect to receive from a course and strive to reach that goal."

The pond was filled with more than the numerous victims who were unwillingly thrown in on the day of freedom. Witnessing the logrolling and canoe jousting, one viewer

Congratulations to Mr. Darwin Boutiette, who took his dunking very well.

The unseasonably warm weather on Walk-Out Day made everything brighter, including the people sitting outside to view the events. Everyone is a little redder, but happier, now. The Stroller gives a cheer for Walk-Out Day and eagerly awaits the 1969 free day.

Weddings and Engagements

Married:

Karen Ann Jones, Skidmore, and Larry L. Rowlett, Maitland, were married Apr. 29.

Engagements:

Sue Calbreath, Altoona, Iowa, to Sigmund Bonebrake Raytown.

'A Crime to Teach Poorly,' Says Professor of Language

"It is criminal to teach poorly," declared a language expert who spoke on campus May 1.

Dr. David A. Dinneen, associate professor of foreign language at the University of Kansas, Lawrence, believes that there must be constant research in methods of teaching to discover systems that are most effective.

When a language teacher is successful, the reason is that he has noted from one year to the next what techniques were most fruitful, according to Dr. Dinneen. Theories, experimental evidence, and his own experience all have been used to the best advantage.

"Language is a habit," Dr. Dinneen explained. "It is recognized that learning a second language later in life is more difficult because the habit of the original is more ingrained. Particular problem habits of any age group should be noted, and teaching should be done within the context of the group."

Noting that instructors during World War II emphasized that spoken language should be learned before written language, the speaker lamented the fact that most secondary language teachers in the United States are still teaching by the grammar translation system. In this system, the student learns up to a certain level, he pointed out, but too often he does not reach the desired speaking level.

"When he comes to class, he must have drill that is interesting. He must make use of his words in a living context. This must take place if we are to change the slow learning under the present system."

Also, the French class must not spend the hour speaking English, the speaker advised.

"Let the students speak French until they have a problem. Then let the conversation be in English only until the problem is solved," he said.

Dr. Dinneen recommended

that grammar be taught by tagmemics, a system which recognizes that every language form (word, phrase, sentence . . .) is composed of two parts, a form and a function. The important thing, he said, is not to be able to analyze a sentence, but to know the steps to go through in order to produce a sentence.

Asked his opinion of the "total immersion" system of teaching a language (which puts the student into a controlled situation that forces him to speak only the language he is learning,) Dr. Dinneen commented: "It is fine but expensive, and therefore not practical for high school or college curricula."

Dr. Dinneen, who was presented as a distinguished lecturer by the department of foreign languages, teaches French and linguistics at the University of Kansas. He is co-author of *Vous Avez la Parole: A Review and Reference Grammar*, published recently by Macmillan.

Women Move Out For Remodeling

Women students who live on the south side of Roberta Hall have been asked to move by tomorrow so that remodeling of the building can begin Monday.

Many areas of improvement, such as a new circulating water pump to give better service on the hot water supply, will be included. Some of the other tentative plans are to improve the plumbing, wrap all exposed heat pipes, and install radiator covers. The shower stalls will have doors and new flooring. Additional shelves will be installed in the bathrooms.

One of the most noticeable changes will be the carpeting of the rooms and halls. Each room will have new drapery rods, new doors, and uniform locks. Many closets will be enlarged in the original part of the old residence hall. Another added convenience will be individual mail boxes for all residents.

As a safety feature, new treads will be put on the stairways.

My 1968 Tower: An Opinion

Or (Boy, Am I Glad I Found My ID)

By Kathi Ebbrecht

At first glance it appears to be a Christmas package. A closer glance gives one the impression it might be an Oriental philosophy book because of all of the weird symbolic designs.

When the cover is opened, however, —voila, a most familiar scene, and the next page — tulips in the winter?

Vanguard Theatre Depicts Problems

By Patty Payne

"Good theatre, like good painting, best finds its cultural purpose in the enjoyment of the people," said Thomas Hart Benton.

The Missouri Vanguard Theatre's production of the "Glass Menagerie" did just that. It was too bad the audience was not larger as the play warmed the hearts of all those in attendance.

The Vanguard troupe, a touring unit, displayed impressive professional qualities in their stage gestures, poise, and interpretation of dialogue in the sentimental play by Tennessee Williams.

Authentic stage settings, as well as effective lighting techniques, helped add realism.

James Assad was outstanding in his portrayal of the soul-searching brother, not yet able to find his place in life.

Harriet Levitt played well a harsh-voiced, domineering mother, who was always endeavoring to find a "suitable gentleman caller" for her meek, crippled daughter, superbly enacted by Carol Pfander, former Maryville area resident. Richard Calvin depicted the "would-be suitor" who belonged to another.

Light humor was added to the somewhat depressing plot with such lines as, "I may rise, but I'm not gonna shine in the morning!"

The play did not have the usual "all is well that ends well" ending. Instead, it left the characters with the same problems with which they began the story; and it left the audience with the inevitable, unsolvable philosophy: "Everybody has problems." Such is life!

Maybe symbolic of the overlapping of seasons? Maybe an allegory depicting an interlocking or overlapping of the stages of . . . Metamorphosis

"Nice picture of the fountain — pity it isn't in color . . ."

The Five M's may mean more than most MSC folks imagine. Some people may read the copy. Of course, there's the rest of us who go straight to the index to see what page we're on. Then, we complain about what a poor picture it is when actually the photography is quite realistic aside from the fact that a few photos are a little blurry.

"Yes, you really do look like that, my friend," . . .

Even though I have yet to figure out the meaning of each of those symbols, I must admit that they are quite intriguing and extremely impressive. . . .

"Have you really ever found yourself in one of those crowd pictures?" . . .

One of the fascinations of the book is the royalty pictures. For the most part, they are interesting, with the exception of one or two in which a beauty is so surrounded by shrubbery she seems to be swallowed by Mother Nature.

I suppose I could tell you how you will cherish your yearbook when you're old and

flabby — but you already know that. Does it have any meaning for you now, though — other than drooling over Felicia Freshman's picture during the long hot summer? Does the theme "Metamorphosis" give you any inspiration as to the "subject matter" of the pictorial essay? . . .

"Isn't that you? Third row back? Page 219" . . .

Seriously, I believe the book is extremely well formulated. The theme is consistent and most appropriate for a fast-expanding school. . . .

"Yeh, they sure are making 'em bigger these days."

For those of you who may be wondering "why the butterfly?", may I suggest "read the copy"? The editorial staff takes great pains in selecting exact words for these informative paragraphs and cutlines and, probably surprisingly to some people, they do have much to say.

For the size of the book and the necessary number of those static group pictures — I am proud of my first Tower. Beverly Beeks and staff — I salute you.

If this is what ulcers produce, I'm not so sure they might not be worth it. . . .

"How come college kids don't sign annuals?"

"I dunno — I guess we're more grown up now."

Dialogue Provides Forum For NOSP Representatives

Kenneth Redick and J. D. Morris, press secretary and former national student coordinator for NOSP, respectively, spoke Monday to those attending Dialogue.

From the moment that Sue Shew introduced the representatives of the National Organization for Student Patriots until they walked out at 7:15 p. m., Redick and Morris were on the defensive.

Redick began by passing out undated news releases listing the aims of NOSP and a sample brochure that had been mailed out to various parts of the country asking for financial support. Morris then announced that his resignation as national student coordinator had been accepted by the board of directors but that he was still a member and sympathizer of the organization.

Morris stated that he and his organization were the objects of a "smear campaign by a minority smear group." This reason and because he believed it would be "best for the school and best for me as a student" were why he resigned, he said.

In response to a question about his membership in the Minutemen organization, Morris answered that he is not in the Minutemen. He did praise, however, the FBI-sought-after Robert Depp, Minutemen leader, as "a man whose courage far surpasses anyone's in this room."

Before coming to MSC, Redick, a Canadian citizen, attended Ambassador College, Pasadena, Calif., for two years

and Midwestern College, Stanberry, for one. He also was one of the founders of the ESP Club on campus.

Redick fears that there is "a masterplot on this planet to destroy God's people." He further believes that "the Bible is inspired" and that "God is still capable of producing miracles."

In further discussion, Morris, a three-month veteran of the U. S. Army, said that when NOSP was first conceived by three MSC students, three phases were set forth as follows: an introductory phase to define the problem and determine the situation, an underground organization stage in which the group would form groups unofficially on campuses in the U. S. and Canada, and a leadership training stage offering courses in guerrilla warfare and wildlife survival.

The NOSP men declared that they had clubs forming in Tarkio, Clarinda, and St. Joseph. The new national coordinator is from Tarkio College, according to Morris, although his identity cannot be revealed.

Many of those present at Dialogue did not receive direct answers to their questions, or else the speakers refused to answer at all because of alleged security reasons. Morris did state, however, that a rumored list of 300 communists at MSC "does not exist," but that a "tickle" of potentially subversive names was in possession of "the intelligence officer."

Dialogue will next meet May 20 on a topic to be announced later.

Kurtz Suffers First Defeat of Season As Bearcats Split Twin-bill With Mules

Scott Kurtz, left-handed MSC hurler, suffered his first defeat of the season Saturday as the Bearcats split a double-header with Central Missouri State at Warrensburg.

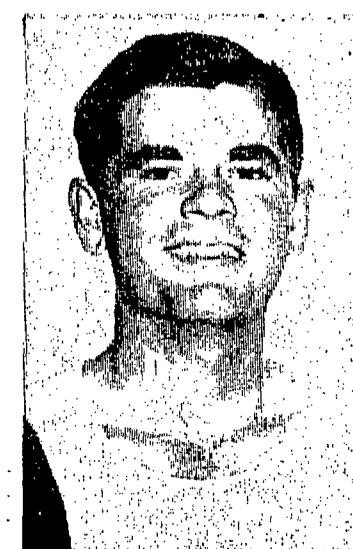

Kurtz allowed only one earned run and three hits in the losing effort, but his MSC teammates could manage only three hits themselves against winning pitcher Phil Gehner as they committed a pair of errors to let in two of Warrensburg's tallies, making the final score in the opener 3-0, CMS. Kurtz, now 5-1 with an ERA of less than one run per game, fanned five, and walked three in nine innings.

Don Orlowski, senior right-hander, salvaged the nightcap for the 'Cats by pitching a three-hitter for a 4-2 win. Orlowski fanned eight and walked two, beating Bill Shine, the last of three CMS pitchers.

The Bearcats manufactured their ninth-inning runs on a leadoff single by Dave Price, who went to second on a ground out; a double by Joe Spinello to drive in Price, and a two-out double by Dave Ross to plate Spinello.

Had the 'Cats won both games of the doubleheader,

they would have assured themselves of first place in the Northern Division of the MIAA and a spot in the champion-

Scotty Kurtz

ship playoffs against the Southern Division winner later this

month.

The Bearcats are now 10-7 in overall competition while Warrensburg is 9-11. In the MIAA race the Bearcats are 6-5 and the Mules, 3-2.

Kurtz and Orlowski have the lowest earned run averages of .64 and 1.08, respectively. Benny Cain and Dave Price lead the team at bat: Cain, .319 average, and Price, .295. The team overall average is .214.

Bob Nelson heads the home-run list with two, and Kurtz, Lou Mooney, and Price follow Nelson with one apiece.

The Bearcats as a team have knocked in 65 runs, with Nelson and Dave Ross tallying 12 and 9 respectively. Mooney leads the 'Cats with 16 hits and Cain, Nelson, and Ross follow with 15 each. Team errors total 49 while opponents' errors total 50.

Saturday the Bearcats wind up their regular season with an afternoon twin-bill against Peru, Neb., at Peru.

Thinclads Fall to Northeast, Tie for First at Graceland

The MSC trackmen were defeated at the hands of talented Kirksville, Apr. 30, by the score of 107-35, but bounced back Saturday to tie for first, 53½-53½ at the annual Graceland Relays.

At Kirksville a pair of 'Cat stars set new school records in winning their events. Kent Kavanaugh, middle-distance ace, toured the half mile in 1:56.2, bettering his own school record by a full second. Freshman standout Cliff Nelles set a new standard in the seldom-run three-mile event with a 15:15.5 clocking.

Also scoring a first for the Bearcats was Charles Lusso, who tossed the javelin 178 ft., 2 in. into the wind.

Injuries and illness forced the squad to compete without the services of stalwart sprinters Pete Hager and Norman Howlett, top hurdler Marty Schwarz, pole vaulter Jim Allred, and distance man Dave Parker.

Freshman Larry Forgey rose to the occasion by pole vaulting 13-1, his best effort to date, to capture second.

At Lamoni, Iowa, Saturday, the thinclads, hampered by cold weather, began slowly, but warmed up late to tie Graceland for the championship, only to lose the first place trophy by the flip of a coin.

Among the 15 teams competing were CMS, Missouri Valley, William Jewell, Ottawa University and Tarkio. This does not include Graceland's Mike Mattox, who staged a one-man track show in accounting for 26 points single-handedly, more than many teams were able to amass.

Although it was a team effort, there were many standouts for the Bearcats. In the 440 relay, Steve Koroch, Dennis Ohde, Hager, and Howlett nailed down first place, and the same four came back to

capture second in the 880 relay.

The 'Cats placed second in the 2-mile relay, with outstanding performances by Roger Stucki, Dave Parker, "Rocky" Reed, and Kavanaugh, and took third in the distance medley.

In the open 2-mile run, Nelles placed second, and in the javelin, Lusso, Steve Schottel and Mitch Hanna placed first, fourth, and fifth, respectively.

Forgey pole vaulted 13 feet to take third, and Tom Dahlhauser placed fifth in the discus. Hager took first in the 100-yd. dash with a 9.9 clocking and Howlett finished a close second at 10.0. Both ran well in the sprint and in the mile relay.

Coach Earl Baker's charges will compete in the MIAA conference meet today and tomorrow at Warrensburg, where they will attempt to end the nine-year domination that Kirksville has had on the circuit.

Cheerleader Tryouts

To Be Held May 15

Varsity cheerleader tryouts, under the direction of Miss Bonnie Magill, will be at 7 p. m. Wednesday in Martindale gymnasium.

Six women and six men will be elected for the 1968-69 season if male students want to participate.

To be eligible, each participant must have an overall 2.0 grade point average, must register in the Registrar's Office by 4 p. m. Monday, and must be able to attend the National Cheerleader Clinic for college cheerleaders Aug. 18-23 at Hattiesburg, Miss.

Sixteen representatives from various departments of the college will judge those trying out. New cheerleaders will be announced following the session.

Walk Out Day Provides Varied Events

Golfers Compete In MIAA Tourney

Today the MSC golfers are participating in the MIAA Tournament at Whiteman Air Force Base, Warrensburg.

During practice the past week, team members have been competing for the six positions. At the tournament, which got under way yesterday, six men are shooting, with the top five being scored.

According to Coach Ryland Milner, Springfield, Rolla, Kirksville, and Cape Girardeau will be in a tight race for the top spot. Individually,

Maiorano has a very good chance to place in the top five or six," he added.

A disappointing showing at Warrensburg and a home victory last week pushed the MSC golfers to a season record of 8-4. The loss to Central Missouri was by a score of 9½-8½. Medalist for the Bearcats was Larry Maiorano, with a 72.

The linksters defeated Graceland on the local greens by a score of 11-7. MSC medalist was Larry Maiorano, who posted a 74.
